THE DETAILS:

All of the odds on a roulette table are based on the "law of averages" The casino can only gain money from the player (being you) playing the table. Until……. NOW!!!!!

We have taken the "law of averages" and turned it into your advantage. Maybe the casino might catch on one day, but there are millions of people playing online casinos and only a small number of people who use this system.

It is 100% legal to use any strategy you wish as long as you don't have any illegal software. And this strategy is your mind and a pen and paper… Thus being perfectly legit!
All casinos' have an "Acceptable loss", which means they can lose a lot of money before changing any gaming rules!

I have played at many online casinos and learned their systems inside and out. This system works best at this tested and deliverable casino. I seriously recommend that you only play at this one casino!

For information on other casino software and programs, email me and I will provide you with ONE OTHER.

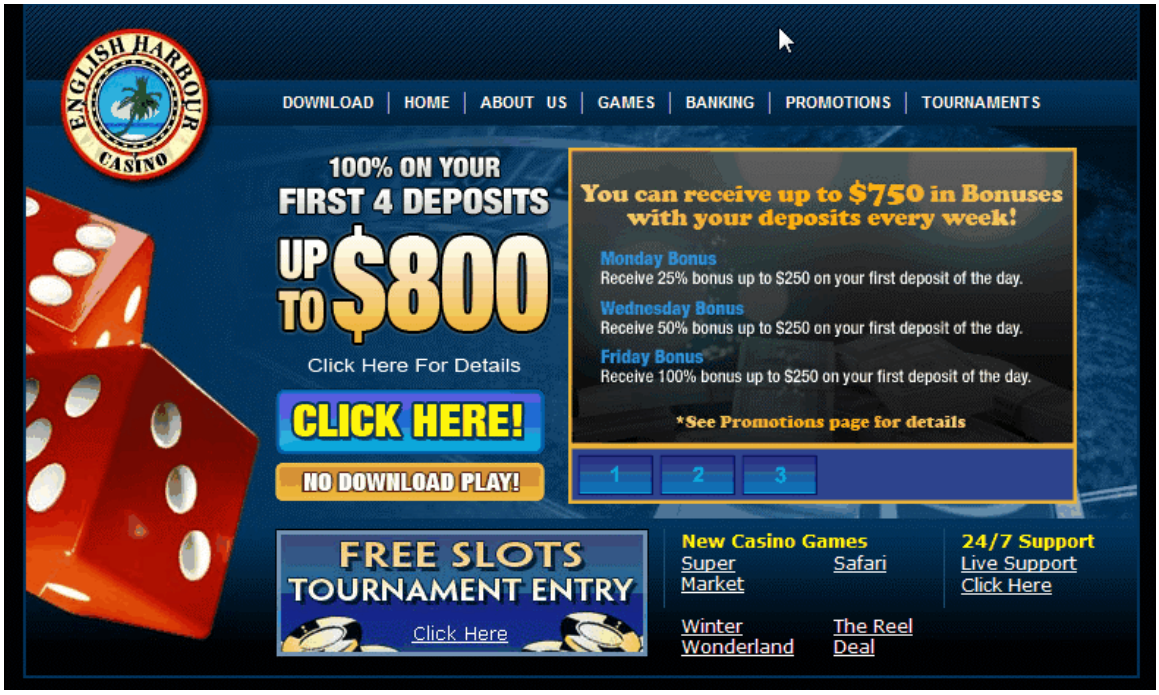
If either of those links do not work, just copy and paste the green link under it, into your browser screen and you will get the correct software!

If you chose to visit the website to download the software, you will be taken here!



Click the Blue FREE DOWNLOAD BUTTON, (this is how you get your bonus, and free money) you must download here. Once you download you can still practice from your new software!

This box will pop up on your screen. Click on save, to save where you want it on your computer. Or click run and it will save it for you. (Follow installation instructions)

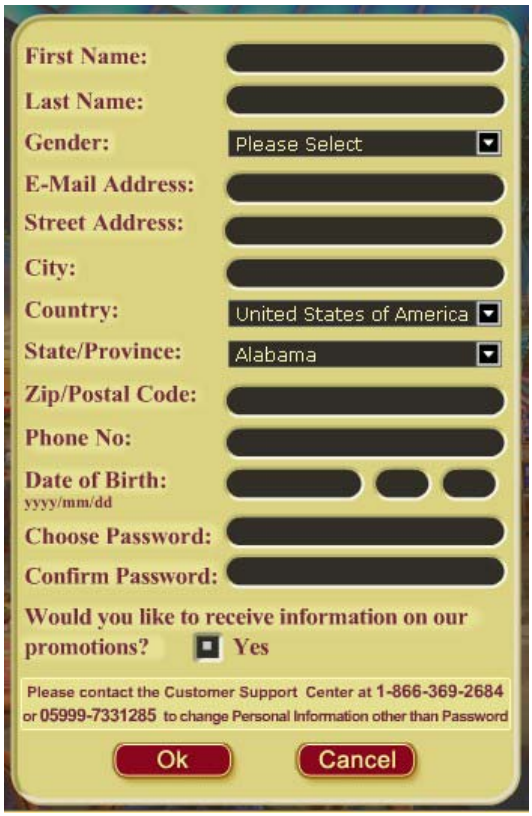
(This is the same screen that will pop up if you chose to automatically download the software! Follow directions from here for auto download link)

This is a very trusted casino and will not cause your computer harm in any way. The money making software size is not large either, so do not worry about space.

After you follow installation instruction, this will show on your screen while it's initializing and downloading software!

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

After installation is done, the casino will open for you and a registration information form will be on the screen for you to fill out, it looks like this:



Fill in your information and click ok!
You are now registered!

This form allows you to be a registered player, you can practice play or play for real money!

You can go right to playing for real money, because you will never lose anything anyways!

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

GET READY FOR EASY MONEY!

After you click Register, the casino will confirm your user name and password. (Make sure you write it down) They even send a copy to your email, for future reference.

After registration, you will usually automatically be logged in, if not you can log in with your new password and user name!

YOU'RE HALF WAY TO A BIG HUGE SMILE!
AND BIG HUGE BANK ACCOUNT!

After you'r signed in you can either play for fun or for real money! I would recommend going for the "real money play" since you cannot lose! Either way, make sure you go to European roulette! It only has one 0 so it's easier.

On the casino lobby screen run your mouse over TABLE GAMES in the top left corner. A list will drop down, go to Roulette and then European Roulette!

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

If its your first time playing the game it might ask you to download the specific game and it will look like this.

Sometimes it will just go right into the game! Either way is fine as long as you'r logged in.

OK now you're registered and signed in and you know where the game is. The only thing left is to deposit money to become a "real money player."
I recommend you deposit $200 (£158) since the casino has a bonus match of 100% up to $200 free, so that means if you deposit $200 they will also give you $200 for a bank roll of $400, hence the reason you do not have to bet any of your own money! And you get the most out of the bonus!

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

This is one of the reasons this casino is so good, the bonus money is also directly deposited into your account, no waiting like other casinos!

If you can't afford $200, at least deposit $150 (£117), which will still give you another $150 for free, for a total of $300.
For this system to work you need a bank roll of at least $300 to start. You may deposit more to play the advanced stage of the system, and this casino offers a lot of weekly bonuses and up to $800 in regular bonuses.

You can automatically withdraw your initial deposit, but I recommend leaving it in there as "sitting money" The casinos favor players with "sitting money" and I truly believe I have done better because of that fact. With this system you do not HAVE TO lose a single penny of your money! Also in case you make a mistake and lose your bonus you will still have your initial deposit to keep going. You have nothing to make but money from there onwards, its 100% safe. Please leave some sitting money to guarantee your results.
I will explain further how to deposit money into your casino account after I explain how the system works!

THE SYSTEM

The Key To Your Success

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

This system is based on betting in a sequence, with the numbers I have analyzed and prepared for you. They have been tried and tested many times and are the best set of numbers for your advantage. Please do not ever change these numbers without emailing me for advice!

The system you will be using is based on these betting terms: HIGH/MIDDLE/LOW
You will be betting on one of these fields H/M/L with a slight increase in the stake, until it comes up.
Keep reading…trust me it works!

You will be placing bets with winnings of 2:1, so that means if you bet $1 you get $3, with a profit of $2 because the original $1 was yours.
Bet $5…make $10
Bet $10…make $20 and so on……

By the "law of averages" these fields have a 1 in 3 chance of winning, and with my system you only need 1 in 19 spins, which has given you 160% chance of winning and have given yourself an unbeatable advantage!
That's right, you have more than quadrupled your chance of winning! (And I always do)

Defeat the "law of averages"!!

There is a HELP menu in the roulette game to help you understand how to play

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

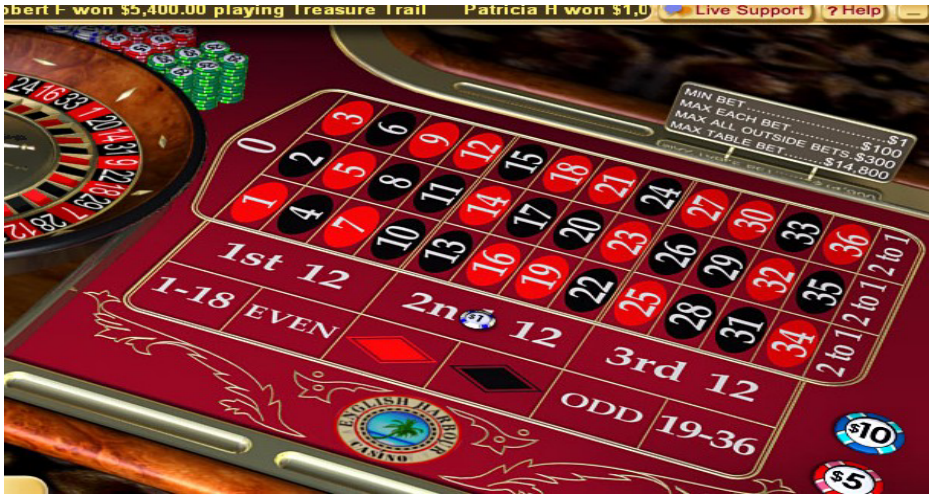
Understanding How To Bet:

You will have 3 fields to watch for and bet on.
These are called "Dozen Bets"

1. This is a bet on LOW with the numbers 1-12 .
   It looks like this: 1ST 12 (see the $1 chip on the board!)

You win if the ball falls on one of these numbers.

2. This is a bet on MIDDLE with the numbers 13-24. And looks like this: 2ND 12 (see the $1 chip on the board!)



You win if the ball falls on one of these numbers.

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

3. This is a bet on HIGH with the numbers 25-36.And looks like this: 3rd 12 (see the $1 chip on the board!)

You win if the ball falls on one of these numbers.

Follow these directions exactly and you will increase your bank account by $1 to $3 in the beginner part of this system and $4 to $20 in the advanced part of this system, with every win you have, regardless of how many losing ones. The number sequence is perfectly calculated so that it always adds more money for each spin, to make up for the loss of the previous spin, plus some so you always win!

OK now grab a blank piece of paper and a pen. I use a book of blank lined paper, so I can keep using it until its full.

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

(Ok so you have to bet to spin the wheel, so to avoid losing any money, you are going to place a $1 bet on RED and a one $1 bet on BLACK, like this!

This way, we know either red or black will win, so it balances out and you don't lose or win, while your spinning to find your sequence and watching the wheel!

You are just betting on red and black and spinning the wheel and watching and recording what drops into the wheel. You are looking to record whether the ball drops in HIGH (H), MIDDLE (M), or LOW (L).

Bet only how I tell you to, never bet at random!

Start recording on a piece of paper what comes up… looking for a consecutive run of 7 spins where a certain field does not come up, of either, H, M, or L. (Remember you are betting $1 on red and black while you do this, so that you can spin the wheel without losing money!.)

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

For example, these numbers fall in:
34, 33, 20, 18, 12, 25, 6, 15, 13, 22, 9, 4, 3

Your notes on a piece of paper will look like this:
H, H, M, M, L, H, L, M, M, M, L, L, L

As you can see, there is a consecutive run of 7 spins and the HIGH (H) field has not come up. Its time to start betting!

Once a field either H M or L does not come up for 7 spins, and its time to start betting on your feild, you can stop betting $1 on red and black, because you are now betting on your field and you can spin the wheel as long as you are betting.

If you understand that, skip the next paragraph!

Further example:

If you count backwards from the last letter in that run (row of letters) you will count 7 letters, all being either L OR M, but yet there is no H. So when this happens you need to start betting from the chart of numbers. But until this sequence happens you only are betting on red and black.
You only bet on one of these three fields if it has not come up for 7 spins, and then you continue betting on it until it does. Remember if you have any questions dowload the FAQ book on the download page or email me at Questions@easyfreeincome.com and I will help you with any questions.

Proceed:

Spin #	Bet This Much	You Make
8.	$1	$2
9.	$2	$3
10.	$3	$3
11.	$4	$2
12.	$6	$2
13.	$9	$2
14.	$13	$1
15.	$20	$2
16.	$30	$2
17.	$45	$2
18.	$67	$1
19.	$100	$0

A HIGH (H) number hasn't come up for 7 spins, so now you proceed to bet on that field (H) until it does come up. And then you win! It's that simple. You break the "law of averages" into pieces.

This table is the number sequence you will be betting with. Remember, start betting on the 8th spin, after 7 spins have been rolled and one of the three fields have not fallen in (appeared) H, M, or L.

Remember, this is just the beginner stage of the system.
In the advance stage, you make 15x the money!
Try this stage first to get the hang of it.

Continue recording what numbers fall, you can continue on the same table after you have won.
Once you have won and your field comes up, STOP and start betting on just red and black again and wait for another consecutive run of 7 spins without a certain field H,M, L showing up…

Remember the only way you can lose is if the field you're betting on doesn't come up for 19 consecutive spins, and to make it clear, you have broken the "law of averages" and gained a 160% advantage! That means you will win 160% of the time, I don't see where you could go wrong! Just make sure to follow my directions exactly and always ask for help if needed

1. Register and create account as shown earlier.
2. Login with user name and password (If you are not already logged in)
3. Deposit: money and be matched at 100%

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

Or click on the PLAY FOR REAL MONEY button within the roulette practice game on the bottom of the screen.

This will pop up again, make sure all your info is correct, and then follow the instruction for deposit (there are many methods, choose what's best for you)

Once you make your deposit this way, you will automatically get your bonus added you your account in a few minuets!

This casino has 24/hour help, live chat or phone support.

I recommend using your credit card, as it is fastest and easiest.

- **Review your numbers if you ever get confused, review the numbers on the display left of your window on the roulette screen.**

- **Make sure you only bet $1 on red and black, that the only way you can spin the wheel without losing any money!**

- **Download the FAQ book at the download page (common asked questions)**

ADVANCED SYSTEM

This is where you make the big $$$

You need a balance of at least $300 to play the beginner system and a casino bank balance of at least $600 to play the advanced system.

You can use the beginner system to gain the money to play the advanced system, or you can go straight to the advanced by depositing the remainder to be able to play the advanced system. You can also get additional bonuses at this casino!

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

Here you will be playing the same way, but with a new set of numbers (with higher return) and another way of recording your sequences and doubling your chances of success.

REMEMBER THIS

Your Advanced system is based on a certain field not coming up for 9 consecutive spins, meaning you bet on the 10th spin.

This is your ADVANCED table
Bet in this sequence to make $4 to $20 a win

Spin #	Bet This Much	You Make
10.	$10	$20
11.	$14	$18
12.	$18	$12
13.	$27	$12
14.	$41	$13
15.	$61	$12
16	$90	$9
17	$135	$9
18.	$200	$4

Do the same thing you were doing before, only bet on red and black until you spin 9 consecutive spins without a field H,M,L coming up. Place a bet on the 10th roll.

Then stop at a win and start over, same as before!

This is how to win $100 an hour and make $400 a day by playing by these rules.

Who do you know that makes $100+ an hour and doesn't have to leave home? Well now you know someone……. YOU!

OK now I have one more awesome way for you to actually double your chances of winning and double your odds of a field not coming up for the amount of consecutive spins that you need before betting.

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

This is called “Column Betting”… your first system was based on “Dozen betting”

So in addition to your “Dozen Betting” You will add “Column Betting”. To double your chances, and not have to sit around and wait so long for one of your sequences to appear.

This is how “Column Betting” is done:

You will now also be watching for 1st, 2nd, 3rd, to have a consecutive run without one of the columns (fields) appearing. Whether it be 1st, 2nd or 3rd.

Use the same piece of paper you’re using for H,M,L and either draw a line down the page vertically, or split the page in half horizontally. You will be keeping track of two different runs now.

They show 2 to 1 on them, because that’s the win…. Remember bet $10 make $20, even though your return will be $30, but the original $10 was already yours, so you pocket $20

This is a bet on 1st: Still 12 numbers 34,31,28,25,22,19,16,13,10,7,4,1

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

This is a bet on 2nd: 12 numbers 35,32,29,26,23,20,17,14,11,8,5,2

This is a bet on 3rd: 12 numbers 36,33,30,27,24,21,18,15,12,9,6,3

Just follow all the same direction for H,M,L and it will work the same way for 1,2,3.

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

So if you roll:

34, 36, 20, 18, 3, 7, 24, 30, 31, 16, 1, 24

Your 1,2,3 record section of your paper would look like this:

1,3,2,3,3,1,3,3,1,1,1,3

Notice the number 2 hasn't come up in 9 spins, you can now place a bet using the advanced table system of this guide.

Use this picture for reference to help you understand better. You can see where the numbers are placed. Either in 1,2,3.

One more trick from me to you:

After you feel confident about using the prior strategies, try this: When you are betting in order of the stakes $ in the tables that I gave you, and it takes more than 5 bets (spins) to get your win, (meaning you won from spin 14 or higher) then after your win just keep on betting on the same field, only $5 at a time though, and most of the time make an extra $20 from doing that on each win!

Copyright © 2006-07, Easyfreeincome.com. All rights reserved.

I win the sequence playing “Middle”, off of spin 14 in the ADVANCED system, which the bet is $41 and I made $13 dollars on that sequence.

Since it took so many spins for my “Middle” to appear, it’s more likely that it will appear again on the next spin.
I often do this technique, sometimes you will lose the $5 so then you just stop and continue looking for your sequences, but often the “Middle” or whatever field I’m playing, will appear 4 or 5 times in a row after that, so I just keep on betting $5 until I lose the spin and I start over.

The previous tip, is just a tip, something that works for me! So if you want to be very cautious, just use the systems and you will be fine!

WANT ANOTHER CASINO??

Important: If for some reason you need another alternative casino, because either the one listed above in the ebook will not allow your state or country, or maybe you would like to play at two casino's to double your profit, or you are having problems downloading. Then this casino will also work great for the USA and most other countries.

CLICK HERE TO GO TO OTHER CASINO!

ATTENTION USA PLAYERS: Due to new regulation in the United States, very few online casino's will allow US players to gamble online. Of course this is one of the few casinos' that still allows US players.. And that's great for us because the system works well at this casino, and it had been tested over and over again! If you are from the US and planning on using a credit card to deposit your money then you must know this:

Once in awhile a US customer's credit card will be declined because credit cards run on a selected screening process by your credit card company, and every so often they will screen a random card and decline a purchase at on online gambling institute. Do not worry though, because all you have to do is try again in an hour or two and it will go through, or you can just simply try a different credit card. The payment on your credit card will not show up on your bill as a casino or anything. It will say just a name of the company you are paying. If you have any more questions just simply email me or even talk to the live 24/hr help at the casino.
